

**Ingram Feed & Seed
2014 Spring Creep Feed Booking**

RANGELAND CALF CREEP 14 AU140 B91 1/8"

This is a very high quality creep feed that is 14% All Natural Protein AND has Aureomycin and Bovatec. The Aureomycin should help control eye problems and the Bovatec will markedly improve feed efficiency. Small 1/8" pellets seem to give us a faster start vs. 1/4" pellets

Current bulk price is	\$316/Ton
Projected in season price is	\$300/Ton
If you take 3% Cash Discount net price would be	\$291/Ton
Prepay now and receive 5% Discount for a net price of	\$285/Ton

IMPORTANT NOTE: We can not pull from these booked Tons until April 1st, 2014!!

Prepay period is from now until April 10th (March Billing Due Date)

We do not anticipate feed costs rising in season BUT can not guarantee they won't.

Prepaying will lock your feed cost at \$70/Ton under last year's prices.

If Ingram Feed & Seed can lock in lower prices between now and May WE WILL LOWER YOUR CONTRACT PRICE ACCORDINGLY. (Lock your top but leaves bottom open.)

We recommend feeding at least 100# / calf of this pellet before switching to an Accu-Ration/Corn mix creep feed. With \$4.25 corn and current Accu-Ration and Accu-Grower prices we can then cut feed cost per ton to about \$240-250 / Ton. The Intake Modification products are a must to control high intakes which hurt feed efficiency and make costs higher.
