Type of Chicken	Picture	Description	Type of Chicken	Picture	Description
Rhode Island Red		Dark reddish brown in color. From day old to 20 weeks, pullets will consume about 17 lbs. feed. They mature rapidly and lay for months on end. Excellent layer of dark brown egg even during winter. Egg Production 200-280 eggs per year Pullets: \$2.75 per Bird	Black Langhan		Black Langshans are from the Asiatic Class of poultry and are a pure breed that originated in China many years ago. These large stunning birds are pure glossy black with bright red combs, dark eyes, and black shanks. Langshans are not as heavily feathered down the legs and toes as Cochins and have a more pronounced upright appearance Pullets: \$3.25per Bird
Dominique		Dominique's are a great bird with a notable rose comb, barred feathering similar to the Barred Plymouth Rock and a dual all purpose chicken. Dominique chickens are generally calm, a gentle breed that makes for a good choice for raising free range chickens because of their barred feather pattern that is thought to offer some protection from aerial predators. Pullets: \$3.25 per Bird	Black Jersey Giants		Jersey Giants, which are very attractive, are the largest of the dual-purpose breeds. They grow very slowly and are a poor choice for the production of broiler meat; however, the hens may be expected to weigh 9 pounds and are a good producer of brown shelled eggs. Pullets: \$2.75 per Bird
Ameraucana		Baby: comes in all colors just like mature birds. Mature: Easter egg chick. Medium size with pea combs. Come in a variety of color patterns. Extremely hardy. Recommended for laying and not exhibition. Lay blue-green shade egg from turquoise to deep olive. Egg Production 200-280 eggs per year Pullets: \$2.75 per Bird	Black Sex Link		Excellent layers of brown eggs. Pullets are black with a reddish cast Egg Production 200-280 eggs per year Pullets: \$2.75 per Bird
Buff Orpington		Baby: soft light buff. Mature: pure golden in color. Large bird with a quiet disposition. Can take the cold well. Good for eating and make excellent setters. Good brown egg layer. Weight: Female 6.5 lbs. Male 8 lbs. Egg Production 200-280 eggs per year Pullets: \$2.75 per Bird	Golden Comet		The Golden Comet Chickens are one of 2 Modern Day Brown egg laying strains from hybrid breeding that produce fast body development and fast egg production. These strains will start to lay eggs at a younger age than most standard breeds and produce big brown eggs. Egg Production 250-320 eggs per year Pullets \$2.75 per Bird
Specked Sussex		This variety of the Sussex breed makes for a good backyard chicken and dual purpose for meat or egg production. This bird is a very good layer and handles confinement well. Their speckled coloring makes them blend in with the background and camouflages them from predators such as coyotes, and foxes. They molt year and more speckles appear so they become even more colorful the older they get. Pullets: \$3.25 per Bird	Production Red		Production Reds are a brown egg layer that was developed for efficient production of large brown eggs. Crosses utilizing Rhode Island Reds and New Hampshire Reds were used in the development of this breed Egg Production 300+ eggs per year Pullets: \$2.75 per Bird
New Hampshire Red		Baby: uniform light red having light chests and wing tips. Much lighter than Rhode Island Reds. Mature: rich chestnut red with a black tail. Lays a brown egg. Egg production 220-280 eggs per year Pullets: \$2.75 per Bird	Silver Laced Wyandottes		Originated in New York State and is the parent variety of the all of the other Wyandottes. The Silver Laced Wyandotte chickens are a docile bird, clean legs, Mostly black laced silvery white feathers and black tail; Red rose comb, earlobes, and wattles. They will on occasion go broody and they make excellent mothers. They work well in confinement or free range. Pullets: \$2.75 per Bird
White Leghorn		Baby: light yellow bird. Mature: All white outstanding small bodied bird that performs extremely well in cages or on the floor in well-managed housing. Very efficient. Produces one dozen eggs on just 3.89 lbs. of feed. Weight: 4 lbs. Egg Production 220-280 eggs per year Pullets: \$2.75 per Bird	Barred Rocks		Most selected and profitable chicken in the U.S. Excellent egg layers and best for the farm and poultry shows. Egg Production 200-280 eggs per year Pullets: \$2.75 per Bird
