<b>PHEASANTS</b>		
0-6 weeks	Turkey/Pheasant Str Crmb	1.0 - 3.0
6-12 weeks	Turkey Grower	0.25 - 0.5/week
12 weeks and older	Grower-Cal	0.5 - 1.5/week
Mature Breeders	Breeder Pels	0.5 - 1.5/week

<sup>a</sup>Feed should be offered free choice, but periodically make birds clean up. Ranges shown are due to the great variability in body size of breeds involved in each category. For breeding flocks, restrict feed consumption to about 80% of normal consumption to prevent excess fattening. Clean, fresh water should be available to the birds at all times.

<sup>b</sup>Use Layer or Egg Maker Crumbles for production of table eggs; Breeder for production of hatching eggs.

<sup>c</sup>Turkey Grower-HS Medicated should be fed as a preventive measure if there is danger of blackhead infection.
