

Vinyl-Poly Wood Combination Arbors

The classic styling of these wood alternative structures complements your garden's natural style and adds an elegant focal point to any walking path.

Fairfax Ranch Arbor (item A18): Opening width 48", depth 35", square lattice.

Berkeley Heights Arbor (item A19): Opening width 48", depth 35", square lattice.

The Countryside Estate Collection has been created by our designers using the long lasting material combination of poly lumber and vinyl encased wooden posts. This material selection allows us to not only produce classic styles which are strong and durable, but they are virtually maintenance free.

- Our arbors are environmentally friendly. The majority of the material is made from recycled plastic.
- The color will not fade. A UV inhibitor is added to the vinyl to protect it from the sun's ultraviolet rays.
- They keep their great appearance for many years. Periodic cleanup can be done with soapy water and a soft bristled brush.

Decorative Lattice Fencing and Gates

A. Arbor Gates - Fit opening widths of 45" or 60". Choice of diagonal or square lattice (item A46 shown)

B. Wing Extensions - Sold as pairs, each piece 28" wide including end post. Choice of diagonal lattice (item A41) or square lattice (item A40).

C. Lattice Fencing - Each section is 72" wide, standard height of 51". Choice of diagonal lattice (item F01) or square lattice (item F02). Each fence section comes with one 74" post.

Wood Arbors

Vinyl - Poly Garden Swing

Garden Swing (item P41): Garden Swing with adjustable canopy cover (item P42). Shown with English Swing (item P24) available in green or burgundy.

- Arbors -

Each kit comes with everything necessary for installation and can be easily completed by one person. Fasteners used are screws and bolts which come included with the arbor; some kits also require the use of a construction adhesive. Assembly time generally takes 15-60 minutes depending on the model purchased. Each kit includes detailed instructions.

- Material -

The material used is all premium grade (C&btr) preserved pine and kiln dried after treatment. Your structure is ready to be stained or painted upon delivery and can be matched to your existing landscape color scheme, or it can be left unfinished. If left unfinished, it develops a silvery gray appearance. It will resist moisture, insect and fungus damage, and look great for years of service.
