Mammoth Bronze Breasted Turkey

Bronzes are Handsome, colorful birds that attract attention whenever seen. Hens average 18 to 20 pounds and toms average 30 pounds.

Cuckoo Marans

It is a dual purpose bird and is known for its deep chocolate brown eggs. The brown egg color can vary in darker and lighter as the hen's goes through laying cycles. vitamin K and calcium can have some limited help with keeping the dark brown color. They are a fast growing bird and a very rare breed here in the United States. The Cuckoo Marans has a black and white feather pattern similar to the Barred Plymouth Rock.
