

Herman's Tortoise

Testudo g. hermanni

Distribution: Europe East to Turkey

Size: 6" - 8"

Natural habitat This rarely available tortoise occupies the Evergreen Mediterranean Oak Forests of Southern Europe east to Turkey. It does well outdoors in mild climates.

Behavior: Males can become territorial, separate from other males. Docile and friendly, easy to handle. Provide dark hiding places.

Captive environment: Use full spectrum lighting 12-14 hours per day. Provide a basking area with access to a cooler zone and an uncluttered 6' x 2' x 2' enclosure with maximum floor space.

Temperature: Day temperature should be gradient from 78 to 90 degrees F. Maintain night temperature range between 70-75 degrees F. Use reptile heating pads under tank for 24-hour heat.

Humidity: This species requires low to moderate levels of humidity.

Water requirements: Provide a large shallow bowl for drinking and soaking.

Nutritional requirements: This species is an herbivore (plant eater). Likes dark greens (collard, mustard, turnip, dandelions). Feed beets, spinach, cabbage, and/or kale in small amounts. Supplement leafy diet with (squash, sprouts, and zucchini). 10-15% of diet may include fruits (papayas, mangos, figs).
