

The Original BioBrick®

One pallet of BioBricks delivers more heat than a full cord of wood.

Biobricks® are ideally sized for wood stoves. Packing density is optimized. This high density fuel extends your burn times greatly. 100% wood, no artificial binders

Cost effective, 1 lb of **Biobricks®** equals 1.7 lbs of cordwood *Environmentally friendly using our renewable resources *Clean burning - minimal smoke, creosote and ash *Lights with newspaper, no mess, no chopping, no bugs *Easy to handle 38-42 lb packs with 50 packs per pallet *Lessens our dependence on foreign oil *Safely and easily stores inside or out *Pallet size approximately 4x4x3 and is easily stackable *Average burn time of 12 hours per stove fill *Uniformity in size, density and moisture ensures predictable burning each time

Hardwood Blend Pellet Fuel

Maine Woods Pellet Co.

A premium wood pellet has no additives like glue or other adhesives.

We offer premium hardwood blend pellets from Maine Woods Pellet Company, located in Athens, Maine. This pellet is a blend of approximately 65% hardwood (primarily maple & yellow birch) and 35% softwood (fir and pine). The raw materials for these pellets come from sustainable woodlands that are owned and managed by certified Master Loggers.

The highest grade pellets.

Maine Woods pellets meet or exceed all the specifications of a premium pellet: Consistent hardness and energy content; uniform dimension (less than 1.5 inches long); limited sawdust (amount of fines passing through .125 inch screen no more than .5 percent by weight); low salt content (no more than 300 parts per million); and low ash content, an important factor in maintenance frequency.

Quantities

Premium pellets in 40lb bags or bulk.

Independently tested for quality.

Each batch of these quality pellets is tested by an independent, third-party lab to guarantee you receive a clean burning, low ash fuel. Our pellets meet the Pellet Fuel Institute's specs for a premium pellet.
