

WHAT YOU WANT TO KNOW

SITE PREPARATION:

- For a longer lasting concrete make sure your base material is well compacted.
- To control the depth & cost of concrete use a base material that can be leveled such as sand or gravel.
- Wetting the base material just prior to pouring allows the concrete to set up slower & gain additional strength. The slower the setup the stronger the concrete.

HOW LONG DO I HAVE?

Typically, due to our specially formulated additive, you will have approximately 30 minutes to reach your site and empty the trailer. This could vary depending on weather temperature. Our additive also cushions the concrete while in transit to keep it from settling. Contrary to what some might think, adding water does not delay setup time. Soupy concrete has no body and separates out while in transit. Excess moisture makes for a very weak concrete.

TOWING REQUIREMENTS:

Fully loaded A-1 Rental concrete trailers are **HEAVY!** Getting your vehicle to safely stop while pulling one can be a big problem. Therefore we reserve the right to inspect your vehicle and hitch system to determine whether you will be allowed to tow our trailers with your vehicle & if so, how much concrete you can safely haul. We require at least a 1/2T pickup and a Class II hitch with a 2" ball. If you have any questions please call. We'll be happy to discuss with you.

 READY-TO-POUR**

WHY USE TRAILER-HAUL CONCRETE?

- No driveway or yard damage from heavy concrete trucks.
- Reach areas inaccessible to concrete truck
- Work at your own pace. No 30 minute time limit.
- No 3 yard minimum charge
- No hand mixing of sack concrete.
- Our retardant additive allows additional working time plus added concrete strength.
- Air entraining agent makes for smoother, easy-to-work concrete.
- We use smooth pea gravel ideally suited for the smaller jobs.
- Our new automated mixing system mixes accurately and mixes fast.
- 4 minutes per yard is all you need to be on your way.

OUR POLICY

- Your vehicle must be capable of pulling up to a 4500 lb load.
- 2 " trailer ball is required.
- Trailers free for up to two hours
- Trailers must be returned clean
- Refundable \$20 clean-up deposit
- No concrete sold within 2 1/2 hrs of closing
- Trailers must be returned before closing. No overnight rentals
