## Pattern Definitions

| Pattern Name                  | Definition  |
|-------------------------------|---|
| Baby Butterbean               | Miniature version of the Canoe pattern.   |
| Baby Doc                      | Miniature version of the Doctor's knife.  |
| Barlow                        | A one or two bladed jack knife pattern with an extra long bolster on the blade end, and usually no cap end bolster.   |
| Bartender's Knife             | Designed as a bartender's tool, this pattern features a spear, pen, label blade and corkscrew. The Case Bartender's knife is on a Large Gunstock frame.   |
| Bird Hunter                   | Muskrat style knife utilizing the bird hook and clip blade, ideal for cleaning fowl.  |
| Canoe                         | The copperhead bolsters of this equal-end knife pattern make the knife resemble the shape of a canoe; Spear and pen blades are common.  |
| Cheetah®                      | Slim, sleek, shaped lockback pattern with a clip blade and a swing guard.   |
| Cheetah Cub®                  | Miniature version of the Cheetah.   |
| Congress                      | A knife pattern with a slight upward tapered curve (like a crescent) in the middle of the handle. The bolsters are squared and equal-ended housing two or four blades, including the sheepfoot master blade. This is the style of knife that President Lincoln was carrying when he was shot. |
| Copperhead                    | Jack knife with the pocket end bolster shaped like a Copperhead snake's head.   |
| CopperLock®                   | One part Trapper, one part copperhead, one part lockback and 100 % Case best describes this Case Lockback!  |
| Doctor's Knife                | Originally designed for physicians and pharmacists, this jack knife includes a pill crusher bolster and may have a spatula blade used for scooping powder from vials and loosening caked powder or perhaps as a tongue depressor.   |
| Dogleg Jack or Dogleg Trapper | Jack knife with a serpentine-curve shaped handle pattern; clip or clip and spey blade.  |
| Eisenhower                    | An equal end gentlemen's pen knife, favorite knife of President Eisenhower; now embellished with Eisenhower's signature.  |
| Electrician's Knife           | A jack knife designed for electrician's use, usually with a locking screwdriver blade, pruner blade and a bail to attach to belt.   |
| Elephant's Toe                | A large double-ended pen knife with a spear blade designed for cutting rope; also called a Sunfish  |
| Equestrian's Knife            | Built on the Trapper frame, the clip blade and hoof pick make this a great tool for both horse and rider.   |
| Executive Lockback            | Gentlemen's lockback with stainless steel handles.  |
| Fishing Knife                 | A multi-purposed Toothpick knife with clip blade and scaler blade with hook disgorger - used to remove hooks, and clean fish, features a hook sharpener inbedded in the cover.  |
| Folding Hunter (Clasp)        | A large clasp style jack knife used for cleaning game or for sport.   |
| Grand Daddy Barlow            | The largest of the Barlow patterns, fondly called the Grand Daddy Barlow.   |
| Gunboat Canoe                 | Large equal-end Cattle knife pattern with the copperhead bolsters which looks like a canoe with three blades.   |
| Gunstock                      | A jack knife handle pattern with the frame which resembles the stock of a gun.  |
| Half Whittler                 | A two-blade pen knife built on a whittler frame - usually with a clip master blade and a secondary pen blade.   |
| Hawkbill                      | Pruners or Lineman's knife used as workman's tool   |
| Hobo®                         | Term that applies to slot knives that typically have a knife, fork and possibly a spoon. The scales slip apart for individual utensil use and when finished, lock together again to form a pocketknife.   |
| Hunter Trapper                | Trapper frame with the guthook blade, the saw blade, and the master clip blade designed for cleaning game.  |
| Jack Knife                    | A knife pattern where the blade or blades open from one end of the knife.   |
| Junior Scout                  | Designed for camping or scouting needs, this equal end multi-bladed knife includes 4 blades; a master spear, screwdriver, can opener, and leather punch.  |
| Large Clasp                   | A large jack knife with an upward curved handle that tapers to a point.   |
| Large Texas Toothpick         | A term used for a slender serpentine style clasp knife with a pointed end bolster, also called the "Tickler" pattern.   |
| Mid-Folding Hunter            | One-hand opening clip blade with thumb stud, liner lock and pocket clip; medium sized version of the Folding Hunter with extras.  |
| Mini Copperhead               | Gentlemen's pen knife with the cap end bolster is shaped like the snakes head.  |
| Mini CopperLock®              | A smaller version of the CopperLock®.   |
| Mini Muskrat                  | A medium size version of the Muskrat using the 18 stockman frame.   |
| Mini Trapper                  | A medium size version of the Trapper using the 07 frame.  |
| Moose                         | Using the 75 stockman frame, a double-end knife sporting equal length clip and spey blades.   |
| Muskrat                       | Serpentine shaped double-end knife with two muskrat clip blades, used for skinning and fleshing animals.  |
| Peanut                        | Small serpentine-shaped jack knife, shaped like the peanut shell with a clip and pen blade.   |
| Pen                           | A knife pattern where the blades open from opposite ends of the handle, usually a clip and pen blade; also referred as a small gentleman's knife.   |

|                        |  |
|------------------------|--|
| Pocket Hunter          | Small version of the Folding Hunter, this pattern was named TH'165 in honor of Case Model Maker, Tom Hart.   |
| Razor (One Arm Opener) | Barlow pattern with a razor style blade with a corner of the blade protruding from the handle. This allows for the knife to be opened with one hand by snagging the point on a pant leg or other object. When this pattern has this style of blade, the pattern number includes RAZ to indicate it's a "one arm opener". |
| RussLock®              | A knurled lever on the back of the clip blade makes this a one-hand opening knife, including with a liner lock, this was named in memory of W.R. Case & Sons founder, Russ Case.   |
| Saddlehorn             | A curved or clasp style Jack knife whose handles resembles the shape of a saddlehorn, with a clip and possibly a spey blade.   |
| Seahorse Whittler      | A traditional style Wharncliffe Whittler pattern with the frame resembling a seahorse.   |
| Sleeveboard            | A jack knife with a handle shaped like the small ironing board used for pressing shirt sleeve; master spear and a sheepfoot blades.  |
| Slim Line Trapper      | Thinner version of the trapper; used for skinning and fleshing animals   |
| Slimlock®              | A modern Gentleman's knife design with liner lock with a thumb stud for easy-opening; first released with BG-42 steel and ladder damascus blade.   |
| Small Saddlehorn       | Miniature Saddlehorn Jack knife.   |
| Sodbuster Jr.®         | Smaller version of the Sodbuster® embellished with the "Sodbuster, Jr." etch.  |
| Sodbuster®             | Sturdy utility knife designed with skinning blade and black synthetic handles embellished with the "Sodbuster" etch.   |
| Sowbelly               | Heavy duty cattleman/stockman style knife with a rounded shape frame resembling the shape of a sow's belly; generally three bladed with the clip, sheepfoot and spey blades, sometimes built with five blades.   |
| Split Back Whittler    | A whittler pattern with a tapered spacer between the springs. Two springs support the master blade on the pocket end of the knife - with each spring supporting one secondary blade on the cap end.  |
| Stockman               | Double-ended serpentine-shaped knife, designed for castrating animals and general farm chores; generally with 3 blades - two on the pocket end (where the main blade is) and one on the cap end of the knife.  |
| Swell-Center Jack      | A one-ended jack knife with a swell center handle which resembles the bottle shape of a very famous soft drink.  |
| Texas Jack             | Typically, a two-bladed jack or a large square end premium jack knife with the clip master and a pen blade.  |
| Tiny Muskrat           | A small version of the Muskrat knife.  |
| Tiny Trapper           | A small version of the Trapper knife.  |
| Trapper                | Jack knife with full-length clip and spey blade designed for skinning animals and similar duties.  |
| Trapper Nut            | Peanut framed jack knife which uses a clip and a spey blade - the same blade configuration as the Trapper.   |
| Whittler               | Three bladed knife designed for carving or whittling wood has a Large Master Blade on the pocket end and two smaller blades - usually a coping and pen blade on the opposite or cap end. Generally the Master Blade falls in between the two smaller blades when the knife is closed.                                    |
| XX-Changer®            | Case lockback knife with four exchangeable blades for multiple uses.   |
