

## Triple Crown Training Formula

**High in fat and calories for hard-working horses requiring an elevated level of calories.**

NEW! Triple Crown Training Formula is a high fat, high calorie diet for any horse in intense work, requiring an elevated level of calories. Training Formula is also high in digestible fiber helping to lower soluble carbohydrates to a moderate level of 22.4%. The first Triple Crown feed to contain fish oil and flaxseed to dramatically increase the level of Omega 3 fatty acids. Research has found that feeding a diet higher in Omega 3 fatty acids decreases inflammatory responses following exercise.
