Better Cattle Start With Better Nutrition

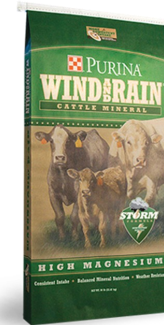

Wind & Rain Hi Mag

Balanced mineral nutrition

Wind and Rain® Storm® minerals contain the proper balance and ratios of all 14 essential cattle minerals. Matching the correct product for the cattleman's available forage assures cattle receive the mineral nutrition they need for health, growth and reproduction. This product is designed for a 2 ounce consumption rate.

Contains High Magnesium

For prevention of grass tetany. An effective solution to address mineral deficiencies associated with fescue forages.

Contains large particle size ingredients and rain protection

Resistant to wind losses and rain damage.

Exclusive Storm® Formulation

Resists water, not digestion. Storm® Formulation nearly eliminates water retention and clumping or "bricking." That means cattle will continue to consume the mineral even after it's been wet. Though it resists moisture, Purina research reveals that it does not prevent digestion. Result: Less Waste.

At Purina Research Farms It Is

A Way Of Life You Have To Live
To Truly Understand.

That is why at Purina they feed more than 3,000 animals on 1,200 acres of working farm every day.

Because a commitment to doing what is best for animals demands nothing less.
